Cartograms, Crime, and Location Quotients

Martin A. Andresen, Kathryn Wuschke, J. Bryan Kinney, Paul J. Brantingham and
Patricia L. Brantingham

Prototyping Burglary Simulations for Crime Reduction Forecasting

Nicholas Malleson and Patricia L. Brantingham

EDITOR'S NOTE

Welcome to the second issue of *Crime Patterns and Analysis*. Although we were not able to publish two issues this year as hoped, we are still receiving quality manuscripts, as shown in this issue. The articles included in this issue are, again, from some of the most respected scholars within this discipline. We will be trying something different this coming year in an attempt to continue offering the best material in this discipline. Bryan Kinney of Simon Fraser University will be guest editing a special issue of *CPA* on "all things happening at SFU." If this special issue is as successful as we expect, we may do a special each year highlighting the work at some of the top institutions in the world doing environmental criminology. This special issue will be in addition to the regular issue (or even two) we hope to publish this year. If you have any questions about the articles, or if you are interested in publishing in *CPA*, contact me at JTWALKER@UALR.EDU.
